DETAILED ACTION

THIS OFFICE ACTION IS IN RESPONSE TO APPLICANT'S AMENDMENT FILED 5/5/2008.

Status of Claims

- Claims 3, 13, 18, and 20 are canceled.
- Claims 1, 4-8, 10-12, and 15-17 were amended.
- Claims 1-2, 4-12, 14-17, and 19 are pending.

Response to Arguments

[1] Applicant's amendment and arguments filed 5/5/2008 regarding rejections under 35 U.S.C. 103 have been fully considered and are persuasive. In view of the amendment to the claims, the prior art does not provide sufficient motivation for combining the Katagiri and Peterson, then Lu references. Accordingly, the Examiner has withdrawn all previous rejections over Katagiri in view of Peterson (and Lu).

Allowable Subject Matter

[2] Claims 1-2, 4-12, 14-17, and 19 are allowed.

Reasons for Allowance

[3] The following is an examiner's statement of reasons for allowance. This application has been reviewed by the examiner and meets all formal and substantive (i.e., statutory) requirements and the language of the claims is enabled by, and finds adequate descriptive supported in the application disclosure as originally filed.

The primary reason for the allowance of the claims is the presence of limitations in the independent claims, which are not found in the prior art references. The examiner believes that the record of the prosecution as a whole makes clear his reasons for allowing a claim or claims. However, the examiner would like to point out one or more specific reasons and/or limitations

Art Unit: 3677

that the prior art fails to disclose and/or make obvious. Hence, with regard to independent claim 1, the most applicable prior art of record Katagiri fails to disclose of a plurality of pivotal plates connected to the visual display device with a rotational shaft inserted into said plurality of pivotal plates as well as the other required features such as a frictional member, tightening member, and plate shaped spacer with their configuration and structure claimed with regard to one another. Though art, such as that of Lee shows of a rotational shaft inserted into a plurality of pivotal plates, even with such a combination with Katagiri and other art of record (Peterson, Lu) the additional amended limitation to the claim of wherein one of the plurality of pivotal plates is provided on one side of the frictional member and another of the plurality of pivotal plates is provided on the other side of the frictional member fails to be met.

Similarly, with respect independent claims 10 and 15, there is no motivation to combine the references of record due to the relationship and placement of the various structures of the plurality of pivotal plates, fixing plate, rotational shaft, frictional member, tightening member, elastic members, guiding protuberances, pivotal guiding portion, cylindrical spacers, and a plate spacer, as well as the limitation of wherein one of the plurality of cylindrical spacers is provided on one side of the frictional member and another of the one of plurality of cylindrical spacers is provided on the other side of the frictional member.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
